IStructE Young Members visit	2
Sponsorship for local girls football team	2
Local Recruitment	2
Neighborhood Feedback	2

Sisk have teamed up with Alumno Developments to design and build a 659 bed Student complex, for Birmingham City University.

Work is well underway to redevelop the site as part of Birmingham City Council's Big City Plan, with the facility due to open to students in September 2016.

PROJECT PROGRESS

The second floor walls are being erected on block A, as well as third floor walls on block B and fifth floor slabs on block C.

Bathroom pods are being prepped for plumbing on the ground floor of block B and C.

As well as this, all service holes on the ground floor of block B and block C are complete.

A view from Curzon St. showing current progress of the project. The canal opposite the site will increase the visual aesthetics of the building when finished.

The installation of ground floor window frames and glass are complete throughout the building. Block C also poses a large retail area in the lower ground floor to provide services for future students in the building.

UPCOMING WEEKS...

The plant room is expected to be fitted out in the coming weeks. The pods on the ground floor of each block will be plumbed. As well as this, dry-liners and screeders will commence work on the ground floor of each block.

IStructE Young Members visit

Eastside Locks welcomed thirteen young members from IStructE this month, helping them gain an understanding in precast concrete structures.

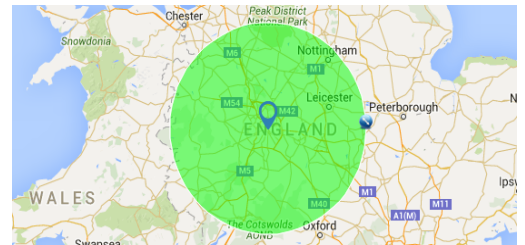

Sponsorship for local girls football team

John Sisk & Sons LTD. are proud to announce the recent sponsorship of Knowle FC u-10 girls football team based in the Birmingham area.

Local Recruitment

A recent survey has shown that 80% of site operatives live within a 50 mile radius of site. Local recruitment is something John Sisk prides itself on.
